

DT Ltd.

Diamond Temple

Project Summary

2017

May

THE BIRTH OF THE COMPANY

DT Ltd is the first company in the world to use the power of buying groups for investment in the diamond industry. It has created a system by which you can buy certificates and blistered diamonds for investment at extremely favorable terms through the formation of independent buying groups.

In this way you can take advantage of a legal and mathematically sustainable earnings system by which each of us can have an extra income.

DT Ltd, presented in July 2016, and started with the activities in September 2016, already has thousands of customers in 13 countries.

Having the opportunity to acquire diamonds on concessional terms makes it possible to create a virtual currency whose value is supported by a guarantee.

Unlike many companies that have started their path from the issuance of a virtual currency and then run to the frantic search for a system to create a counter, which makes expendable and therefore credible currency, DT Ltd has chosen the opposite route: it created first the necessary conditions to guarantee the nominal value of its virtual currency and has used the partnership arrangements necessary for immediate marketability both online and in physical stores

DT COIN

Thanks to the agreement with a major software company, which owns Server Farms in Dubai and Eastern Europe makes it possible to create an algorithm for the issue and mining its own virtual currency, and the creation of a blockchain and finally an exchange platform open to the public; thanks to the company's will to invest in diamonds to be made subject to ensure value to its virtual currency; Finally, thanks to important negotiations with Londoners Funds interested to intervene to achieve agreed business objectives of growth in corporate capital through the purchase of qualifying holding, DT Ltd wants today to start the process of launching on the market theDT COIN, insert a own virtual currency that already during the start-up and pre-emission provides certain guarantees of concrete support.

Although not at this stage we are a real cryptovaluta decentralized and open source, and unlike others in the industry that are not yet in a position to offer equal guarantees, the DT COIN, even before he was born, that will take its first walk from January 22, 2017 through the issuance of 10 billion coins ready to mining, (initially centralized then externalized through open source software) with a nominal value of 0.05 Euro launch, it aims to make the correct path to be recognized as a real currencyin the near future.

TRIPLE BOOST TO THE DT COIN REVALUATION

Unlike other projects that see the emergence of virtual currencies whose value will be increased solely by demand law / demand of the market, the DT COIN want to start with an important momentum since launch for its revaluation.

It uses a push triple system adopted by the company DT Ltd that will see the money start a growth path starting from January 22 (actual start time to the issue and launch pre-centralized).

This route is for all those who intervene in the process of preparation for mining:

- 1) Intrinsic Reassessment of guaranteeing data diamonds: diamond, a safe haven for excellence, is reevaluated constantly for over 25 years on average between 4% and 6%; the full appreciation of the precious gem is intended to increase the value of currencies in mining;
- 2) Revaluation of business: a percentage of corporate profits from DT Ltd is dedicated to further growth in mining of coins, with the system directly proportional to the amount of optioned coins from their customers through the purchase of Hardware Pack, or the enterprise server portions DT Ltd that will employ for mining;
- 3) Exchange Platform: public exchange platform activated during 2017, where everyone will be able to give in and buy DT COIN with other private users to the value in euros at the time of the exchange.

WHAT IT MEANS TO INVEST IN START UP FASE

Just a Bit Coin has taught us the importance of believing in the birth of a new virtual currency since its first moments of life:

introduced in 2009 without any counter-guarantee and market it, when it came to light the first time, the Bit Coin has increased its value by 85,000 times in just seven years; this means, for some, having turned a single dollar in over \$ 85,000 in 7 years.

A unique phenomenon? Probably we have no ambition to emulate him However also an increase of 1000 times lower than the Bit Coin would already be a good result.

While not wishing to provide, for ethics and fairness, a result of mathematical certainty, that only time will perhaps give, it's just stop and linger in distinctive elements that now offers the DT COIN.

BUY YOUR HARDWARE PACK

With the Hardware Pack, everyone becomes part of a buying group with which DT Ltd acquires property in Dubai server lease, pro rata, for 12 months, subscribers Hardware Pack .

With the Pack Hardware subscription you get the option of a specified quantity of DT COIN that will be mined from January 22, 2017, with a centralized mining process.

The coin extraction will be done by its own Miner with HSM technology in the 12 months of original algorithm.

The Miner will extract on behalf of the subscriber the amount of coins optioned with the Hardware Pack.

The number of DT COIN mined from their Miner can be viewed by accessing the reserved area on the website.

Register as DT PROMOTER to the site www.dtcoin.co.uk (ask your sponsor code to the person who introduced you to this project) to receive your customer number.

Obtained the customer number, in the address you indicated during the registration process, you can log in using the code as a user and password of you choose to access the online store where you can choose one or more Hardware Pack among those proposed, taking into account also the pre-launch active Bonus.

The pre-launch bonuses are very important as they will give you a chance to have a greater number of DT COIN minable and therefore a greater gain already at their launch. We invite you to choose the Hardware Pack according to your real needs and possibilities.
NB: the purchase of a Hardware Pack should never be confused with an investment

Important Notice

Revenue:

all bonuses and career qualifications are calculated on Revenue (REV); 1 revenue = 1.20 euro turnover

Scores and qualifications:

all REV will always add up to the attainment of qualifications; The bonus levels and career achievements remain

70/30 rule:

all bonuses are paid following the 70/30 rule where 70% is related to DT Value for cash out and 30% is related to DT Value can only be used for the purchase of Hardware Packs

Cryptovaluta:

We emphasize once again that although the term like Cryptocurrency, is sometimes used loosely. DT Ltd properly and honestly specifies that at this stage the DT Coin it's not yet a Cryptocurrency because we just started what it need to be. Anyone independently claimed the opposite is responsible for his statement to the law.
